PROJECTS

Spotify Clone project

This project is a simplified clone of Spotify, created using only HTML and CSS. It demonstrates the following features:

- *Navigation Bar:* A top navigation bar with links to Home, Search, and Your Library.
- *Sidebar Menu:* A sidebar with options for various playlists and library management.
- *Main Content Area:* A central area displaying playlists, song lists, and album covers.
- *Footer Music Player:* A footer with playback controls, volume control, and a progress bar.

This project is a static representation and does not include any backend functionality or dynamic content loading. It is intended as a front-end exercise to showcase HTML and CSS skills.
